THE SCIENCE OF SURVIVAL

ACR PathFinder™₃

Search and Rescue Transponder (SART)

When interrogated by radar, this unit transmits 12 intense radar screen blips, greatly enhancing search and rescue efforts. In fact, a Search and Rescue Transponder is mandatory for all commercial vessels that must conform to GMDSS, and any vessel carrying more than one life raft. The exclusive ACR test mode provides visual/audible feedback confirming operational status.

- Compact unit easily packs into life raft
- Quick release mounting bracket included
- Operational life: 96 hr in stand-by mode; in excess of 8 hrs in operational mode
- High impact polystyrene case designed to withstand rugged environments
- Includes 10 m lanyard for security and collapsible pole both stowed inside SART
- Waterproof to 10 m
- Transportation safe long life lithium battery (5-year replacement life) (2714NH only)
- Worldwide certification; complies with GMDSS, IEC, IMO/SOLAS 88, ETSI 300 151 and RTCM standards, FCC approved, MED

SPECIFICATIONS

Product Number 2714
2714NH (non-hazmat batteries)

Size 31.8 x 7.6 cm
easily packs into life raft

Weight 680 g

Material High impact polystyrene

Color Hi-Viz Yellow

Deployment Manual

Operation: Pull front lanyard to break safety tab. Switch ring is spring loaded and will move to the right and activate

Battery Lithium, 5 year replacement life

Waterproof Up to 10 meters

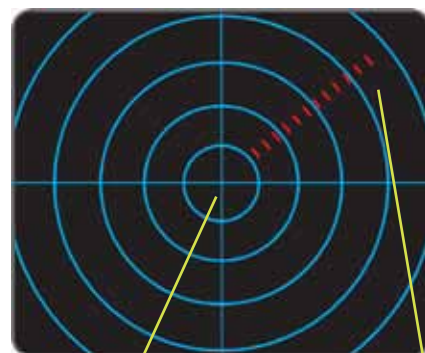

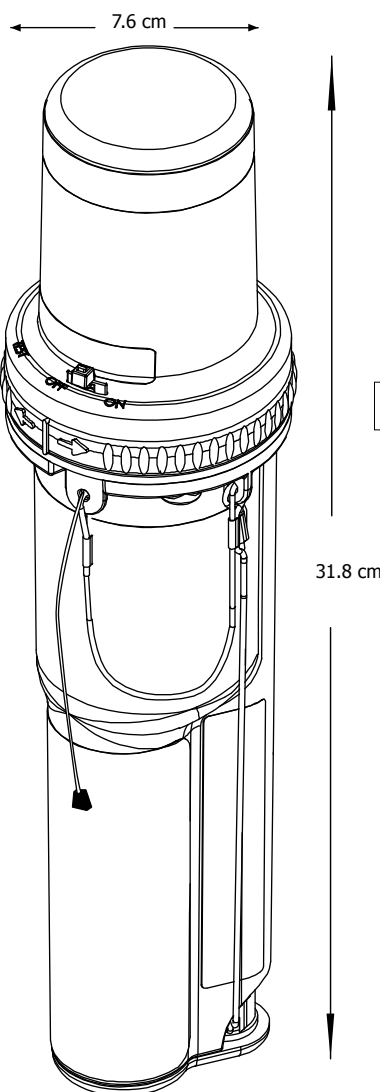

Certification Complies with GMDSS, IEC, IMO/SOLAS 88, ETSI 300 151 and RTCM standards, FCC approved, MED

Carton Dimensions 36.3 x 15.2 x 11.4 cm

Units Per Carton 1

Carton Weight: 1.08 kg

Limited Warranty 1 year

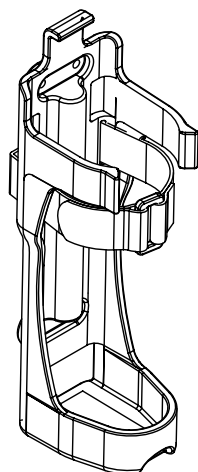

Ship Location

Pathfinder™₃
Location

- Multiple SART Interrogation Testing
- 3 Modes of Operation: Receive, Reply, Test
- 1 Meter Collapsible Pole Stowed Inside Case
- Easily Packed into Life raft
